Case Study

ARCADE UK and HARRODS

Client: Arcade working on Harrods project.

OHS has undertaken a series of Asbestos Awareness Courses for all the Arcade workforce working on the Harrods Project. Leading to certification of all Arcade staff involved proving them to be amongst the best trained operatives in asbestos awareness in the construction industry. The Value of the Arcade project is £10,000,000.00 and it is to Design and build: Upgrade of rooftop HVAC over the following time scale;

Phase 1- Summer 2008

Phase 2- 2008-2009

Phase 3- 2009-2010

This project is to replace the existing HVAC system on the roof which had come to the end of its useful life.

The existing plant on the roof provides tempered fresh air to the whole store by means of air handling units supplied with chilled water from air cooled and water cooled chillers or hot water via a steam plate heat exchanger.

The Training was completed on site on Harrods Rooftop so as to disrupt the work to a minimum and OHS also continues to carry out a series of Specific Type 3 Asbestos Surveys as part of the long term partnership arrangement with Arcade and Harrods.
