Health Safety and Environmental Management The Compliance Consultancy

Case Study
Cadbury

'Delivering the vision'

*An incident and injury free
environment for all OHS
clients*

OHS form a Partnership with their clients seeking the best solutions to health safety and environmental issues on an individual basis. OHS seek to become an integral part of the clients organisation as demonstrated by the words of;

John Jepson one of OHS experienced and knowledgeable Consult

The Cadbury Experience

'The first surprise on arrival at Cadbury Bournville is the sheer size of the factory it's enormous! and has been there a very long time! The second is the all pervading odour of chocolate it is everywhere.

I will have been here for over two years. I know the lay out of the factory better than most employees who have been here thirty to forty years, as workers tend to stay in the same department for years on end.

OHS have surveyed the whole complex and are now engaged in the re inspection of all the ACM's. Substantial abatement and remedial work has been undertaken in a very short period of time with more expected within the near future. I would like to take this opportunity thank everyone who worked on those projects.

OHS have an excellent relationship with the client and have helped them with providing solutions to some very challenging problems.

OHS have introduced at Bournville the OHS asbestos knowledge chain which is being considered for all other Cadbury sites within the UK and Ireland and subsequently overseas. It has been a rewarding but very demanding experience for me. I am always rushing here there and everywhere especially since we have trained the staff in asbestos awareness, the training has worked well, staff at all levels are now aware of their responsibilities in the safe management of asbestos materials and the importance of OHS's contribution to everyone's safety in the workplace.'
