Health Safety and Environmental Management The Compliance Consultancy

Case Study The Co-operative

*'Delivering the vision'
An incident and injury free
environment for all OHS
clients*

The **co-operative**

Overview: OHS were selected by the internationally renowned client The Co-operative Group, to work in close partnership with their own Property and Health & Safety teams in relation to the Control of Asbestos Management. Objectivity, expertise and a practical approach to achieving compliance were key requirements in their search for a leading independent consultancy. OHS fulfilled all the criteria and provided added value including a twenty four hour fully supportive helpline.

Sector: Retail and Banking.

Location: Nationwide – 3000 sites from the Shetlands to Cornwall.

Project duration: Rolling Contract.

Key Performance Indicators: With Asbestos being a high-profile risk it is important to deliver accurate results to the client within very tight timeframes. These expectations OHS constantly meet in all areas of services delivery.

The OHS Role: OHS formulated a detailed Asbestos Policy and Management Plan which we are assisting the in-house team to monitor, develop and manage. OHS reviewed the Client's procedures in relation to the control of Asbestos in all their premises including their Retail and Banking sector and provided expert and practical advice to assist in achieving Compliance. OHS are undertaking a series of Risk Assessments in accordance with HSE and Asbestos Regulatory Body demands. OHS have advised on an action plan and the implementation and management of any remedial works identified. OHS are assisting with the development of a monitoring strategy, in order to measure the continued performance of the systems in place and define any improvements that are needed as well as methodologies and timescales for completion. Consultative advice includes reviewing all systems and services across all sites this process is continually reviewed for maximum compliance.

Significant results: The Introduction of an extensive recording system in relation to the Control of Asbestos. Structured undertaking of Risk Assessments nationwide in accordance with all asbestos regulations. The management of any remedial works identified during the Risk Assessments. OHS have also compiled a training needs analysis in relation to Asbestos Control and are in the process of delivering training to support this at a variety of levels within the organisation.

Conclusion – How OHS Adds Value: The work undertaken by OHS significantly reduces risk to the organisations workforce within their distribution, commercial, banking and retail premises and to the general public across all their sites and is targeted to save considerably on insurance premium costs and any large legal fees that non compliance could attract. Other significant OHS multi site clients to recognize the benefits of the company's Asbestos Management Services include BP LPG, Sainsbury, ASDA, North Somerset Council, Rank, Nestle and Cadbury.
