

## Health Safety and Environmental Management The Compliance Consultancy

### Case Study

### Doncaster and Bassetlaw NHS Trust

**Client:** Doncaster and Bassetlaw NHS Trust

**Contract Value:** £50,000 per annum

**Contract Type:** n/a

**Approx. Fee value:** £ n/a

Doncaster and Bassetlaw Hospitals   
NHS Foundation Trust

### Project Description:

We have provided Asbestos Management services to the Trust since 2004. The services which we have provided include:

- Desk top study of existing Asbestos information.
- Type 2 surveys to hospitals (live working environment). A survey programme was developed for each hospital to ensure that arrangements could be made with regards to access and health and safety of employees and patients.
- Type 3 surveys to selective areas which are undertaken to facilitate maintenance work, refurbishment work and demolition. These have now been superseded by HSG 264
- Annual asbestos re-inspections
- Compilation of Asbestos Management Plan. To ensure that all Asbestos is managed properly we developed an action plan for the Trust to determine, for each Asbestos item, whether it needed to be removed, encapsulated or re inspected. This action plan included budget costs. This is reviewed on a six monthly basis and updated appropriately.
- Compilation and updating of Asbestos Policy and Procedures. To ensure that the Trust fulfils its obligations to communicate with employees and contractors safe working procedures with regards to working in the vicinity of asbestos we developed a Policy and Safe Working Procedures. This is reviewed on a six monthly basis.
- Provision of Asbestos Awareness training to Trust employees. To ensure that the Trust complies with Regulation 10 of CAR 2006 we provided Asbestos Awareness training.
