Health Safety and Environmental Management The Compliance Consultancy

Case Study
Haringey Council

*'Delivering the vision'
An incident and injury free
environment for all OHS
clients*

Haringey Council

The Management of Health and Safety by OHS is amongst the most extensive and thorough in the UK not only because of the knowledge and experience of their Consultants but due to their innovative Tracker Database and the depth of the Training that they offer to all clients.

As noted in the following case;

'Since 2007 OHS have been providing Asbestos Management services to Haringey Council (Schools Department). Sebastian Mazurczak is the allocated OHS Consultant and has been managing a number of projects including the re-inspection program and subsequent removal/encapsulation works.

OHS have also provided Asbestos Awareness training as well as OHS on line Tracker Asbestos Database which Haringey Council and all the schools are able to access.

The feedback received from the client has been excellent – especially in terms of how quickly OHS respond to requests, how helpful OHS staff are and the level of communication throughout the projects'.
